

# Construction Update: Guideway Installation

Contractors for the Surrey Langley SkyTrain are actively installing the guideway spans between columns. Launching gantries will move from column to column to lift and join segments to complete each span.

**In the coming weeks, a launching gantry will be active in your neighbourhood.**

## What to expect:

- Temporary access changes for roads, intersections and driveways while the gantry is working above
- Short-duration traffic stoppages
- No pedestrian, cyclist or vehicle access under the operating gantry
- Increased traffic and noise levels
- Some work may occur at night to reduce disruption and access impacts

중요정보: 번역해주세요

**Surrey Langley  
SkyTrain**

Follow along as our four launching gantries move down the alignment.

Precast concrete segments are manufactured at a facility in Surrey.

More than **4,400 segments** will be lifted into place.

Please plan additional travel time, consider alternate routes and use caution while in the project area.

Visit our website to sign up for project updates. For detailed traffic information, we post a weekly traffic advisory on Fridays.
