

Foundation Construction: Pile Driving in Langley

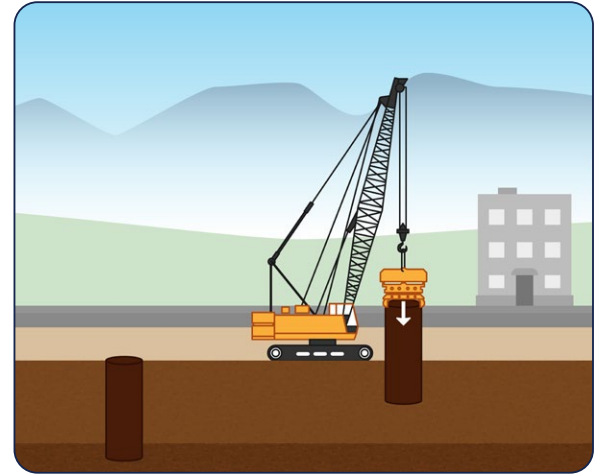

January 2026

Construction for the Surrey Langley SkyTrain Project is underway.

Pile driving for the guideway foundations will begin in February 2026 in Langley City, just east of Highway 10, and on Industrial Avenue. Foundation construction will continue east through Industrial Avenue until mid-2027.

What to expect:

- Intermittent hammering to construct deep foundations using large cranes and equipment.
- An increase in noise and vibrations while this work is underway. You may notice things like water in glasses moving or light fixtures swaying. Vibrations are assessed prior to construction and monitored at active work areas to ensure building structures are not affected.
- Traffic pattern changes on nearby roads, intersections, and driveways to allow space for large equipment and safe work zones.
- Possible night work — information will be shared on our website.

중요정보: 번역해주세요

**Surrey Langley
SkyTrain**

Steps we are taking to reduce impacts:

- Noise shrouds around pile driving equipment
- Noise blankets on project fencing, where possible
- Vibration and noise assessments and monitoring at active work areas
- Updates during construction to help you plan ahead

Traffic pattern changes:

- No access to the laneway east of Highway 10 (Langley Lane)
- Eastbound traffic only on Industrial Avenue from 200 Street to 203 Street
- Lane reductions on Production Way, east of Fraser Highway
- Check traffic updates in the Weekly Traffic Advisory available on our website

Thank you for your patience during construction.

Traffic patterns and timelines are subject to change.
